POPULATION, MIGRATION AND DISASTERS

Class 8 Geography | Sample notes

1. MIGRATION – Movement of people

- Migration is the movement of people from one place to another.
- Push factors: **lack of jobs**, poverty and droughts in villages.
- Pull factors: **better jobs**, schools and hospitals in cities.
- Effects: **crowded cities** and the growth of slums.
- Movement from villages to cities is called **rural-urban migration**.

2. URBANISATION – Growth of towns and cities

- Urbanisation is the growth in the share of people living in towns and cities.
- Causes: **industries** and better jobs in cities.
- Effects: **traffic jams**, pollution and a shortage of housing.
- Measures: **planned cities** and better public transport.

3. EARTHQUAKES – Sudden shaking of the ground

- An earthquake is a sudden shaking of the ground.
- Causes: movement of the **tectonic plates** under the Earth's surface.
- The point on the surface right above where it starts is the **epicentre**.
- It is measured on the **Richter scale**.
- Effects: **collapse of buildings** and loss of life.
- Precautions: take cover under a **strong table** and stay away from windows.

QUICK COMPARISON

- Migration = people move (pushed out, pulled in)
- Urbanisation = cities grow (jobs in, traffic out)
- Earthquakes = the ground shakes (plates move)
